

General
 The plan area comprises a linear block of essentially commercial plantation that, along with the other adjacent areas of the FES estate and private forestry, forms part of the Glentool massif.
 The plantation is visually prominent from the county roads to the east and south and has a relatively uniform age structure.
 Potentially a high profile block for Biodiversity / Environment and Conservation opportunities with UKBAP priority habitats and species present.

Habitats and Species Map:
 coupes are identified for felling during the approval period of this plan.
 Water sampling in this acid sensitive catchment is planned during phase 1 of the plan. Subject to the receipt of favourable results from either these or other future sampling results, Galloway FD commits NOT to carry out restocking in these coupes.
